

Delivering a Comprehensive Line of Process Equipment

Triangle Process Equipment offers a robust line of specialized stainless steel and disposable process equipment for use in the pharmaceutical processing, beverage manufacturing, food processing and cosmetics manufacturing industries. We can deliver a pump for any application — from heavy-duty centrifugal pumps and lobe pumps, to piston pumps for use with high viscosity materials. Our heat exchangers and sanitary valves are designed to be durable and easily cleaned. We also offer a wide line of process equipment components and accessories.

Fittings

Our stainless steel tubing fittings and sanitary hose crimp fittings are precision machined, resulting in trusted hygienic performance in the pharmaceutical manufacturing, food and beverage, and cosmetics industries.

Sanitary Fittings: Alfa Laval, TopLine, VEN, Dixon Bradford

Specialty Fittings: TopLine

Gaskets: Rubber Fab, Flow Smart, TopLine

Hoses & Tubing

From silicone tubing to stainless steel PTFE hoses, our hoses, tubing and disposable process components ensure sanitary fluid-handling for the pharmaceutical manufacturing, biotech, biopharm, food, beverage and cosmetics industries.

Tubing: AdvantaPure, Masterflex, TBL, Flow Smart

Hoses: AdvantaPure, RubberFab, Flow Smart, ACE Sanitary

Manifolds & Assemblies: AdvantaPure

Mixing & Agitation

Our sanitary agitators and mixers are easy to clean and accommodate a variety of applications — from gentle to high intensity mixing — for the pharmaceutical manufacturing, biotech, biopharm, food, beverage and cosmetics industries.

Agitators: Fristam, TopLine, VNE, Dixon Bradford

Mixers: Metenova

Tanks & Accessories

Our selection of sanitary tank equipment including stainless steel tanks, plastic tanks, manways, weighing systems, sight glasses and tank lights ensures reliable containment, access and monitoring of product processing.

Sanitary: Alfa Laval, Feldmeier, Archon, Fusion Fluid

Industrial: General Industries, Fusion Fluid, Wolfe Mechanical, Archon

Heat Exchangers

Our stainless steel heat exchangers including gasketed, shell, tubular, scraped-surface, electrical resistance, plate condensing and plate evaporating ensure the efficient and consistent transfer of heat from one component of your process to the next.

Sanitary: Enerquip, Alfa Laval, APS

Industrial: Enerquip, Alfa Laval

Pumps

Whether you need assurance of sterile operation or an economical solution, our stainless steel and disposable pumps dependably drive production in any sanitary processing application.

Diaphragm: Quattroflow, Graco, Almatec

Lobe & Piston: Fristam, Alfa Laval, Ampco, Wright Flow, Mouvex

Sanitary Centrifugal: Fristam, Alfa Laval, Ampco, Top Line

Shear: Fristam

Peristaltic: MasterFlex, PCM

Seal-less: Mouvex, MasterFlex, Graco, Almatec, Quattroflow

Sanitary Piston: Graco

ANSI & Self-Priming: R.B. Mosher

Specialty Pumps & Systems: Standard, PCM, Graco, MasterFlex

Valves

Rely on our selection of stainless processing valves — including hygienic diaphragm, sanitary, radial diaphragm, aseptic and check valves — as well as actuators and automated valve units to efficiently control your product flow in a sterile and simple to clean manner.

Valves (Continued)

Diaphragm Valves: Gemu

Ball Valves: Sharpe, TopLine, Dixon Bradford

Butterfly Valves: Alfa Laval, Dixon, TopLine

Check Valves: Alfa Laval, Dixon, TopLine

Single Seat & Mixproof Valves: Alfa Laval

Tank Bottom Valves: Sharpe

Sample Valves: TopLine, Gemu

Relief Valves: TopLine

Specialty Valves & Accessories: Gemu

Dry Connects: Dry Link, Dixon

Industrial & Utility Valves: Sharpe, Gemu

Skidded Systems

Rely on our selection of stainless processing valves — including hygienic diaphragm, sanitary, radial diaphragm, aseptic and check valves — as well as actuators and automated valve units to efficiently control your product flow in a sterile and simple to clean manner.

Skidded Systems: Techniserv

Filter Housings

Our single round, sanitary filter housings and replacement components for the pharmaceutical and bioprocess industries are engineered to minimize contamination in a wide range of applications. Inline, T-style and custom designed filter housings, as well as a variety of inlet/outlet, drain and vent connections are available.

Replacement Components: Techniserv

Filter Housings: Techniserv
